RE: Santa Clara River System

Gentlemen:

It has been brought to our attention that you have not installed the necessary diversion structures to enable your commissioner to properly measure and regulate your water from the Santa Clara River drainage.

It is important that you install a measuring device in your inlet canal so that your commissioner can properly measure and record the water you divert. You are therefore directed to install a suitable measuring device, and in your diversion dam a gate that can be set and locked.

You are hereby ordered to make the installations on or before June 1, 1968.

Please notify Mr. Gerald Stoker, Area Engineer, when you have completed your installations.

Should you encounter special problems in your construction, we would be very happy to provide any assistance we can.

Yours very truly,

Hubert C. Lambert  
STATE ENGINEER
